

# CONSENT FORM FOR PUPILLARY DILATION, VISUAL FIELDS, AND RETINAL PHOTOGRAPHY

Acuity Eye Center is pleased to offer RETINAL PHOTOGRAPHY as an extension to our comprehensive eye examination. This is a painless process that uses advanced digital photography to document the important anatomical structures of the eye. This instrument provides important diagnostic information for the Doctor and ensures optimal eye care treatment. Some benefits of the procedure include:

High resolution image of the inside of your eye (retina)

Early detection of GLAUCOMA, RETINAL DEGENERATIONS, TUMORS, DIABETES, and OTHER DISEASES

Photograph of your eye to provide the Doctor an excellent reference to detect subtle changes from year to year

MOST eyes DO NOT require pupil dilation for this procedure; however, if you have DIABETES, HIGH BLOOD PRESSURE, HIGH GLASSES PRESCRIPTION, or OTHER DISEASES, the Doctor will still recommend dilation so she may get the best view and photograph of the eye.

WE HIGHLY RECOMMEND ALL OF OUR PATIENTS CONSENT TO THIS PROCEDURE

There is an additional fee of \$39 for the retinal photography. Would you like to have a picture taken of the retina today? YES NO Initial\_\_\_\_\_

We would like to inform you of our VISUAL FIELD ANALYZER to help detect diseases such as PITUITARY TUMORS, GLAUCOMA, and RETINAL and MACULAR DEGENERATION, OPTIC NERVE DISEASE, RETINAL DISTURBANCES due to VASCULAR PROBLEMS and MEDICATIONS. It is especially important for those patients who have a history of DIABETES, HIGH BLOOD PRESSURE, HEADACHES, MIGRAINES, FLOATERS, RETINAL PROBLEMS, or have a family member who suffers from glaucoma or retinal problems to have this screening. The Visual Field Screening fee is \$20. Would you like to have the Visual Field Screening as part of your comprehensive eye examination today? YES NO Initial\_\_\_\_\_

If you elect to have BOTH the RETINAL PHOTOGRAPHY and the VISUAL FIELD, the fee is \$49.

Our Doctor routinely performs pupillary dilation to rule out retinal disease and to check for CATARACTS, MACULAR DEGENERATION, GLAUCOMA, and OTHER VISUAL PATHWAY DISEASES that may lead to loss of sight. This usually takes approximately 15 additional minutes. Some people may experience blurred vision up close and light sensitivity for a few hours. Most insurance covers this service. Would you like to have your eyes dilated as part of your comprehensive eye examination today? YES NO Initial\_\_\_\_\_
